Probably from Hesby or Otsego to Chandler at first, but I would ideally like them from the NoHo entry sign all the way to Hatteras. Then on Magnolia from Vineland to Tujunga Ave. Could you ask him to give a quote for all three ?

Very cool! I've actually driven under those in San Pedro, but only in the daytime.  
I can definitely speak with our vendor and get pricing.

What street segment are you thinking about?

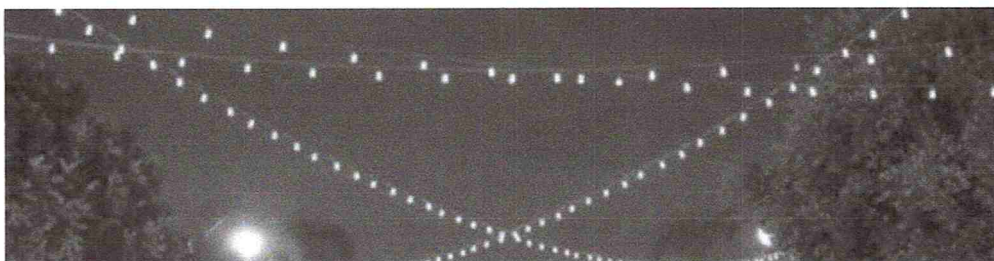

Thanks,  
Aaron

Hello Gentlemen,

The Councilman was in San Pedro last week and we some string lights across the streets in the downtown area, and we thought it would be perfect for NoHo. We might be interested in paying for the lights on this, but would you mind getting some information about how much it would be to get them installed? Is it possible to get a quote from the same vendor that we are using for the NoHo Plaza? They look like this, and are attached to the top of street light poles.

Let me know what you think.

Best,

**Angelina Schneider | Field Deputy, Mid-Town North Hollywood/

Hello Angelina,

Attached is information regarding the string lights and the EV charger location usage costs.

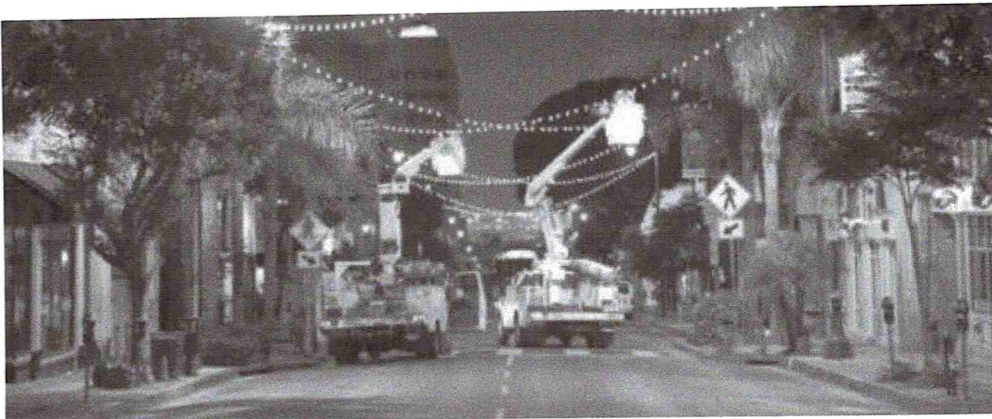

First, the EV charger location in your Council District will charge at \$2.00/hr. The funds collected will mainly go to the Bureau of Street Lighting and LADOT.

Second, I have attached some information regarding the string lights and requirements for the string light installations. One main condition is that Ornamental poles cannot be used.

I hope this helps. Feel free to call me if you have any questions.

Kind regards,

Richard Saplan
